Karen.

At this time Ecology has made some revisions to the permit and the permit is currently under review of our AAG's for compliance with the applicable regulations. I do not have a date at which the AAGs intend to complete their review, but it shouldn't be very long.

After the AAG review, and a quick review by the permittee, the 'final proposed permit' will be sent to EPA Region 10 for a 30-day statutory review.

EFSEC assures you that EFSEC will not consider action on the permit until after EPA has reviewed the permit.

Thanks,

Jim

Jim, just to let you know that I had a conversation with Rich to update him on the status.

I explained to him typically comments are responded to and the permit is issued without an additional public comment period.

I mentioned your process of bringing the final permit to the council prior to issuance, possibly in August.

I explained where EFSEC is in addressing EPA's comments and that by in large most of EPA's comments may be addressed by supplement language in the final permit.

He thanked me for our work to addressing concerns.

You probably don't need to talk to Rick separately, unless you want to.

Karen

Jim, I have two questions. Is EFSEC intending to issue another review draft, or a final permit?

And do you have a specific date set yet? Thanks.
